PROFESSIONAL SUMMARY

Full-Stack Developer and AI/ML Enthusiast with experience building production-ready web applications, AI-powered platforms, and real-world client solutions. Skilled in React.js, Next.js, Node.js, Express.js, MongoDB, Python, and Deep Learning. Experienced in developing scalable REST APIs, authentication systems, cloud-based media management, and AI-driven products.

EDUCATION

Vishwakarma Institute Of Information Technology **Pune, Maharashtra**
B.Tech in Information Technology | CGPA: 8.28/10 *2026*

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, HTML5/CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

AI / ML: PyTorch, Scikit-Learn, Deep Reinforcement Learning, Prompt Engineering

Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI

Tools: Git, GitHub, Postman, VS Code, Google Colab, Cloudinary, Docker

RESEARCH INTERNSHIP

Task Offloading and Resource Allocation in Mobile Edge Computing **Feb 2026 – May 2026**
Energy-Aware DROO Algorithm Research Internship

- **Tech Stack:** Python, PyTorch, NumPy, SciPy, Google Colab, Deep Reinforcement Learning
- Implemented and evaluated the Deep Reinforcement Learning-based Online Offloading (DROO) algorithm for task offloading and resource allocation in Mobile Edge Computing (MEC) environments.
- Analyzed optimization and reinforcement learning approaches including Genetic Algorithms, Ant Colony Optimization, and Deep Q-Networks to identify scalability and performance limitations.
- Developed an Energy-Aware DROO extension using a multi-objective reward function balancing computation performance and energy consumption.
- Designed a channel-aware energy model and conducted experiments on 30,000 wireless channel samples under varying network conditions.
- Achieved improved energy efficiency while maintaining low execution overhead ($\sim$0.03 sec/channel), demonstrating enhanced practicality for real-world MEC deployments.

PROJECTS

Oya Kekars: Bakery E-Commerce Platform — Live Demo | GitHub **May 2026 – Present**

- **Tech Stack:** Next.js, React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary
- Built a production-ready bakery e-commerce platform with category-based product browsing and WhatsApp-powered ordering workflows.
- Engineered JWT-based authentication with protected admin routes for product, category, and content management.
- Designed scalable MongoDB schemas and RESTful APIs for product lifecycle management, image uploads, and dynamic frontend integration.
- Integrated Cloudinary for cloud media storage and optimized image delivery; collaborated directly with the business owner throughout development.

CutPro: Salon Appointment & Queue Management System — GitHub **May 2026 – Jun 2026**

- **Tech Stack:** React.js, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS
- Built a full-stack salon platform with customer, barber, and admin dashboards secured by role-based JWT authentication.
- Implemented an intelligent scheduling engine with dynamic slot generation based on availability, service duration, leave, and blocked slots.
- Developed real-time queue management for customer check-in, queue tracking, and barber-side dashboard operations.
- Designed modular REST APIs covering appointments, availability, queue operations, reviews, and service administration.

PeerLearn: Real-Time Learning Platform — GitHub **Jan 2026 – Feb 2026**

- **Tech Stack:** React.js, TypeScript, Node.js, MongoDB, Socket.IO, WebRTC, JWT
- Built a peer-to-peer learning platform with real-time messaging, video conferencing, and interactive virtual sessions.
- Integrated WebRTC video calling and screen sharing with Socket.IO for live messaging, typing indicators, and presence tracking.
- Implemented JWT authentication and scalable APIs for user management, session handling, and peer discovery.
- Designed optimized MongoDB schemas for users, sessions, chat history, and communication metadata.

CERTIFICATIONS

IBM Full Stack Software Developer **Jan 2025 – May 2025**
IBM
